PROFESSIONAL EXPERIENCE

Chartered Accountant with **6+ years (including articleship)** of experience combining **finance transformation, business process design, MIS, ERP implementation, digital transformation, and AI-led automation**. Experienced in designing and improving **end-to-end finance and operating processes across P2P, R2R, financial close, statutory compliance, master data, controls, governance, and reporting**. Strong finance-tech profile with hands-on experience in **Power BI dashboards, Excel/VBA automation, Power Query, AI assistants, BRD/PRD, SOPs, UAT, and ERP workflows**. Worked closely with **CEO, CFO, COO, Finance, IT, and Operations teams** while managing **cross-functional teams of 15+ members** across parallel transformation and digital enablement projects. Delivered automation **reducing financial close timelines from ~15 days to under half a day across 21 branches in 15 states**.

Contetra Pvt Ltd, Mumbai

January 2025 – Present

Assistant Manager (Finance & Digital Transformation)

Finance & Business Process Transformation, Design & Governance

- Led **AS-IS diagnostics** and **process discovery workshops** to understand existing finance and operational workflows, identify control gaps, inefficiencies, and process ownership issues across client organizations.
- Designed **TO-BE operating models, SOPs, approval workflows, escalation mechanisms, reporting structures, and governance frameworks** for finance and business processes that lacked formal structure.
- Worked across **CRM, O2C, P2P, master data, statutory workflows, financial close, reporting, GST/TDS, controls, and governance processes**, translating finance and operations requirements into ERP and automation solutions.
- Performed **Licence Optimization, master data assessments, and cleanup initiatives**, standardizing master data structures and improving data quality, ownership, and governance across ERP environments.
- Developed **approval matrices, workflow automation, ticketing systems, and process control mechanisms** to strengthen traceability, accountability, and governance across operational and financial decisions.
- Designed and implemented **centralized operating teams across PMO, Procurement Operations, and Master Data Management**, improving control, visibility, ownership, and governance across business units.

ERP Implementation, Product Development & Technology Enablement

- Prepared **BRDs, PRDs, SOPs, process flow diagrams, solution notes, and functional specifications**, translating business requirements into ERP configurations, automation workflows, and product features.
- Supported **ERP lifecycle activities, including CRP sessions, scenario definition, UAT design, statutory process validation, and data migration** checks for finance and compliance processes.
- Functionally led the design of a **finance and operations-focused** Lead to Cash, Procure-to-Pay product, preparing **white paper, BRD, PRD, solution architecture, process flows, POCs, and MVP** requirements while coordinating with developers during development stages.
- Built **internal digital utilities, including a Master Data Management tool, an AI-assisted reconciliation tool, web-based prototypes, and financial data tracking applications** to improve automation and reporting efficiency.

MIS, Analytics, AI & Automation

- Built **financial statement automation**, including **Schedule III notes** to accounts using **Excel, VBA, and Power Query**, consolidating financial data **across 21 branches in 15 states** and **reducing close timelines from ~15 days to under half a day**.
- Designed **interactive Power BI dashboards** and **MIS reports** enabling leadership teams to monitor revenue, expenses, variance trends, vertical-wise performance, KPI/KRA scores, and operational metrics.
- Developed **automation utilities** and **reporting tools** to eliminate repetitive manual processes, improve reconciliation accuracy, and strengthen financial reporting efficiency.
- Designed and built **custom AI assistants, GPTs/Gems, and AI-enabled consulting workflows** for **wireframe generation, ERP implementation support, reconciliation, and delivery standardization**.
- Implemented post-ERP **data validation and reconciliation frameworks** to ensure financial data accuracy and detect process or system inconsistencies.

Project Leadership, CXO Engagement & Founder's Office Execution

- Managed multiple **finance transformation and digital enablement engagements** across Manufacturing, EPC, Pharma, QSR, Renewable Energy, Trading, and IT sectors.
- Led and coordinated **cross-functional teams of 15+ members** across parallel projects, supervising execution, reviewing deliverables, resolving process issues, and ensuring delivery quality.
- Worked directly with **CEOs, CFOs, COOs, Finance, IT, and Operations leaders** to conduct requirement discovery, validate solution design, drive decision-making, and track transformation priorities.
- Supported **Founder's Office / CXO-level execution** through business dashboards, MIS reporting, process governance trackers, automation roadmaps, cross-functional follow-ups, and structured review mechanisms.
- Trained junior team members and client users on tools, delivery frameworks, system workflows, automation utilities, and process execution standards.

IDFC First Bank, Pune

March 2023 – January 2025

Associate Relationship Manager (Corporate Banking)

- Conducted **financial analysis, forecasting, and credit risk assessment** for 20+ corporate clients across Manufacturing, Renewable Energy & Automobile sectors - supporting lending decisions and risk evaluation.
- Prepared detailed **Credit Appraisal Memorandums**, including **financial modelling, industry benchmarking, working capital analysis, and comprehensive borrower risk assessment** for credit committee approvals.
- Built and maintained **financial models and analysis templates** for credit evaluation, facility structuring, scenario analysis, and borrower performance tracking.
- Performed **variance analysis, covenant monitoring, and financial performance** reviews to evaluate borrower compliance, business performance, and potential risk exposure.
- Engaged with client finance teams and management to gather financial data, validate assumptions, understand business models, and support internal decision-making.
- Supported relationship management, cross-functional coordination, and presentation of credit recommendations to internal stakeholders.

RB Sharma , Chhatrapati Sambhajnagar

February 2020 – February 2023

Article Assistant

- Executed **statutory audits, tax audits, and concurrent bank audits** for clients across Manufacturing, Pharma, Hospitals, Media, Construction, and Trading sectors.
- Prepared **financial statements, income tax computations, audit documentation, and compliance workings**, supporting end-to-end audit and taxation engagements.
- Managed **GST compliance**, including GSTR-1, GSTR-3B, GSTR-9/9C, registrations, refunds, and litigation support.
- Developed **Excel/VBA-based automation tools** to streamline reconciliation and reporting processes, improving team efficiency by approximately 50%.
- Delivered training sessions on **Advanced Excel, VBA, and Tally** to 100+ individuals.
