## PROFESSIONAL EXPERIENCE

**CA-qualified finance and operations builder** with **6+ years** (including articleship) **designing operating systems, automating processes, and driving cross-functional execution across 15 client engagements** spanning ₹50 Cr startups to ₹600 Cr enterprises. **Proposed and implemented a PMO office** from scratch that a ₹600 Cr founder adopted, **cut an O&M billing cycle from 30 days to 7**, and **built a Financial Close Automation Tool** solo in under a month, reducing **close time from 15 days to under half a day** across 21 branches, now live and scaled across multiple clients. Spotted recurring process gaps across client diagnostics and converted the insight into two working SaaS MVPs currently in active development. Comfortable operating in ambiguity, presenting directly to **CEOs, CFOs, and founders**, and owning delivery end-to-end without a playbook.

**Contetra Pvt Ltd, Mumbai**

January 2025 – Present

**Assistant Manager (Finance & Digital Transformation)**

Served as **primary client-facing lead and project manager** across 15 engagements in Manufacturing, EPC, Trading, D2C, QSR, Pharma, Renewable Energy, and IT sectors. Managed cross-functional teams of **15+ members** and internal analysts, outsourced developers, tech partners, and client stakeholders. Presented solutions and **outcomes directly to CEOs, CFOs, COOs, and founders**.

### Process Design & Operational Problem-Solving

- A ₹600 Cr EPC client had **no cross-functional project visibility, no ownership structure**, and fully reactive management across long-cycle, parallel projects, with each team running its own tracker and zero shared accountability. **Proposed and implemented a PMO office** from scratch, defined roles and responsibilities, built a full WBS, introduced SOPs, approval workflows, and escalation mechanisms, converting reactive firefighting into structured, proactive execution.
- A water treatment client's **O&M billing process was broken**, with manual confirmations, unresolved disputes, non-standard billing types not covered by ERP, and double data entry across Excel. **Redesigned the complete billing and confirmation workflow**, reducing the billing cycle from **25–30 days to 7 days (75% reduction)**, directly improving collections speed and financial accountability.
- **Designed a complete end-to-end process architecture from scratch** for a new EPC business line covering multi-profit-center project accounting, long-cycle contract billing, and revenue recognition, which the **founding team adopted and operationalized** for a ₹600 Cr enterprise.
- Conducted **5 diagnostic engagements** across client organizations, identified a recurring pattern of unaddressed finance and operations workflow gaps, and converted this insight into **two MVP-stage product concepts** now in active development (see Projects section).

### Product Development

- Converted recurring finance and operations gaps across client diagnostics into **two MVP-stage SaaS products**, owning **problem discovery, white paper, BRD, PRD, MVP scope, user stories, wireframes, prototype demo, and testing**.
- Built a **P2P & Vendor Management Product** covering **vendor onboarding, vendor lifecycle management, approval workflows, purchase-to-pay tracking, payment visibility, and process governance** for businesses where ERP systems did not fully manage end-to-end P2P operations.
- Built a **Revenue Assurance Product** for project-based businesses **covering contract lifecycle, WBS, milestone tracking, multi-type billing, resource allocation, invoicing, payment tracking, reconciliation, and revenue visibility**.
- Solo-built a **Financial Close Automation Tool** using **Excel, VBA, and Power Query** to consolidate financial data across **21 branches in 15 states**, reducing month-end close from **~15 days to under half a day**; the tool is live and scaled across multiple clients.
- Built reusable finance and AI systems, including **a universal reconciliation engine, master data validation utility, and AI consulting assistants** for ERP implementation, wireframing, reconciliation, data governance, and delivery standardization.

### Automation & Tools Built

- **Built a Financial Close Automation Tool independently in under one month** using Excel, VBA, and Power Query, consolidating multi-entity financial data across **21 branches in 15 states** and reducing monthly close time from **~15 days to under half a day**. The tool is live and scaled to multiple clients.

- Delivered a **stalled Power BI automation project** that no team member could close independently, diagnosed the root cause, rebuilt the solution, and **delivered on time** with full client sign-off.
- Developed a **universal AI-assisted reconciliation tool** with configurable matching logic applicable across any dataset, eliminating manual reconciliation effort across client deployments.
- Built a **Master Data Management utility** validating GSTIN, PAN, MSME numbers, addresses, phone numbers, and duplicate logic across vendor and customer masters deployed across client ERP environments to improve data accuracy and governance.
- Designed and deployed **custom AI assistants and GPT/Gem-based workflows** for ERP implementation support, wireframe generation, reconciliation, and delivery standardization, improving consistency and reducing setup time per engagement.

## MIS, Analytics & CXO Reporting

- Built **interactive Power BI dashboards and MIS reports** enabling leadership to monitor revenue, expenses, variance trends, vertical-wise performance, and KPI/KRA scores used directly for operational decision-making by the CEO, CFO, and COO offices.
- Conducted **AS-IS diagnostic workshops and TO-BE process design** across CRM, O2C, P2P, financial close, GST/TDS, master data, and governance workflows across multiple client organizations.
- Implemented **post-ERP data validation and reconciliation frameworks** to ensure financial data accuracy and flag system or process inconsistencies after go-live.

## IDFC First Bank, Pune

March 2023 – January 2025

### Associate Relationship Manager (Corporate Banking)

Owned **credit analysis and relationship management** for 20+ corporate clients across Manufacturing, Renewable Energy, and Automobile sectors, including accounts at the scale of large-cap listed manufacturers and top-tier automotive majors.

- Built and presented **Credit Appraisal Memorandums directly to credit committees** covering financial modelling, working capital analysis, industry benchmarking, covenant design, and borrower risk assessment, resulting in **approved and sanctioned credit facilities**.
- Developed **financial models and scenario analysis templates** for credit evaluation, facility structuring, and ongoing borrower performance tracking across a multi-sector portfolio.
- Engaged directly with **client CFOs and finance teams** to gather data, validate business model assumptions, and translate operational complexity into structured credit recommendations.
- Conducted **variance analysis, covenant monitoring, and financial performance reviews** to track borrower compliance and identify early risk signals across the portfolio.

## RB Sharma , Chhatrapati Sambhajinagar

February 2020 – February 2023

### Article Assistant

- Executed **statutory, tax, and concurrent bank audits** across Manufacturing, Pharma, Hospitals, Media, and Construction sectors, managing end-to-end audit documentation, financial statements, income tax computations, and **GST compliance** (GSTR-1/3B/9/9C, refunds, litigation support).
- **Built Excel/VBA automation tools** for reconciliation and reporting, improving team efficiency by approximately 50%.
- Trained **100+ professionals** on Advanced Excel, VBA, and Tally during articleship.

## SKILLS & ACHIEVEMENTS

- **Finance & Business Process:** Financial Close | P2P, O2C, R2R | MIS & Reporting | Budgeting & Variance Analysis | Credit Analysis | Working Capital | Internal Controls | GST/TDS | Process Design & Governance
- **ERP Product:** SAP ECC/S4HANA | Oracle | ERPNext | Tally | BRD, PRD, SOP | UAT | Wireframing | MVP Design | User Stories
- **AI Skills:** Prompt Engineering, Model Context Protocol (MCP), Design and Deploy AI Agents
- **Automation & Analytics:** Power BI | Excel/VBA | Power Query | Power Automate | Tableau
- **AI:** Prompt Engineering | MCP | AI Agent Design | Claude | Gemini | ChatGPT | Perplexity
- **Leadership:** Cross-Functional Team Management (15+) | Stakeholder & Vendor Management | Project Budget Ownership | Client-Facing Delivery
- **Achievements & Certifications:**
  - AI Fluency and IND AS Certifications.
  - Trained 1,050+ professionals in AI tools, Advanced Excel, and Power BI
  - 5th Rank in Chhatrapati Sambhajinagar – CA Final (1st attempt)
  - Star Performer & Best Article Award during articleship
